

About

IEEE-VIT (Institute of electrical and electronic engineers) is organizing **NASA international SpaceApps Challenge** – one of the largest hack-a-thons in the world, in collaboration with world-renowned agency NASA. This year, SpaceApps, happening on April 29th – 30th, will bring together developers, engineers, designers, coders and every space enthusiast to solve real world problems.

While our participants are ready to commit the time, energy and effort to make the most of your counsel, IEEE wishes that you, as mentors, will be helping participants grow their technical skills and improvise on their projects.

SpaceApps is expanding and here is an opportunity to enter into an inspiring, satisfying and developmental experience by being a mentor.

Role as a Mentor-

- Being an understanding and trusted listener
- Showing willingness to share your work-life experience
- Providing constructive advice to your mentees.
- Being supportive of the ideas

IEEE-VIT would also appreciate mentors connecting to the participants virtually through Skype calls for a brief interactive session by providing general guidance, recommendations, professional connections and suggested actions to practice.

Being a mentor for NASA SpaceApps challenge, Vellore, you get a chance to be part of conferences and event hosted or sponsored by IEEE, A Certificate of Appreciation from SpaceApps Vellore and IEEE VIT and Customized T-shirts from NASA SpaceApps.
